PROFESSIONAL PROFILE

Senior Data Scientist and Head of Data Management with 16+ years of experience across data analytics, business intelligence, business operations, process automation and digital marketing. I combine strong technical depth (Python, SQL, Power BI, cloud and AI-driven solutions) with hands-on business management experience: I run client engagements, support sales and business development, coordinate vendors and partners, and help shape product strategy and roadmaps.

Beyond leading the data function, I act as a business partner to sales, product and leadership teams. I translate commercial goals into measurable outcomes, keep operations efficient and scalable, and present insights to clients, fund managers and executives. I have also founded and led my own analytics company, giving me end-to-end ownership of strategy, delivery, team and client success.

CORE COMPETENCIES

Programming & Data	Python (Pandas, NumPy, SciPy, Scikit-learn, Matplotlib, Seaborn, Plotly, BeautifulSoup, Selenium, Scrapy, pdfplumber, fuzzywuzzy); SQL (advanced joins, CTEs, window functions, query optimisation, indexing); C++
BI & Reporting	Power BI (DAX, data modelling, drill-through, dynamic KPIs); Advanced Excel (Power Query, Power Pivot); Tableau; Data Visualisation
Data Engineering	ETL/ELT Pipelines; Data Cleaning & Normalisation; Data Quality Management; Data Governance; Databricks; PostgreSQL; MySQL; MongoDB
Cloud & DevOps	AWS (EC2, S3, Lambda, Amazon Athena); Azure (basic); Git/GitHub; API Integration; Heroku; Workflow Automation
Finance & Investment	LP/GP Investor Data Research; Asset Allocation Analytics; Alternative Asset Classes; Private Markets; Fundraising Intelligence; Investment Analytics; KPI Reporting; Financial Metrics; Investor Segmentation; Fund Reporting
Business & Management	Business Operations; Business Development Support; Client & Stakeholder Management; Vendor Coordination; Product Strategy & Roadmapping; RFPs & Proposals; Team Leadership; Process Automation
Languages	English (C2) • German (B1, actively improving) • Malayalam (Native) • Hindi (C1)
Tools & Platforms	Salesforce; Jira; DBeaver; VS Code; Google Ads; Google Analytics; WordPress; Mailchimp; Canva

PROFESSIONAL EXPERIENCE

Senior Data Scientist / Head of Data Management

May 2022 – Present

advinda Investor Cloud GmbH | Munich, Germany

Data, Analytics & Automation

- Built and maintain Python- and SQL-based ETL pipelines for large-scale private markets datasets, automating integration, transformation and validation of data from 20+ structured and unstructured sources.
- Automated recurring data workflows, saving 700+ hours of manual work per year (approx. €35,000+ in annual labour costs).
- Designed interactive Power BI dashboards (advanced DAX, drill-through analysis, dynamic KPIs) for executive-level decision-making; used Advanced Excel (Power Query, Power Pivot) for automated refresh and scalable analytical modelling.
- Built and maintain large-scale LP/GP databases and deliver structured intelligence products to fund managers, placement agents, consultants and advisory teams.
- Implemented and maintain data governance and data quality frameworks across investor and investment intelligence databases.
- Support analytical use cases such as asset allocation, investor segmentation, market mapping and trend analysis, turning business questions into scalable, repeatable data solutions.

Business Operations & Business Development Support

- Manage Salesforce CRM, ensuring data integrity, pipeline accuracy, contact management and reporting quality for sales and advisory teams.

- Support business development by identifying prospective clients, preparing investor intelligence materials, conducting market research and contributing to client acquisition.
- Contribute research, analytics and insights to RFPs, client presentations, investment conference materials and business proposals.
- Coordinate with external vendors, data providers and technology partners to ensure data quality, operational efficiency and timely delivery of business-critical information.

Client Management & Product Strategy

- Participate in client meetings, sales calls and product demonstrations, presenting data insights and intelligence solutions to fund managers, placement agents, consultants and prospects.
- Serve as a key point of contact for clients: gathering requirements, resolving data-related queries and ensuring delivery meets expectations.
- Work closely with product, sales and leadership teams to define product requirements, prioritise features and support strategic decisions with data and market intelligence.
- Provide data-driven recommendations on feature prioritisation, user experience improvements and long-term product roadmap planning.

Founder & Head of Data

Apr 2020 – Dec 2024

LP Data House Private Limited | Kerala, India

- Founded and led an investor data analytics startup delivering Python- and SQL-based analytics and automation solutions for FinTech and academic research clients.
- Managed end-to-end client engagements: requirements gathering, project planning, stakeholder communication and delivery of analytical solutions.
- Led client meetings, presentations and consultations to translate business challenges into actionable data-driven solutions.
- Designed reusable analytical frameworks adopted across 20+ client projects; performed large-scale data cleaning, transformation and statistical analysis.
- Created visual reports and Power BI dashboards that communicate complex insights clearly to non-technical decision-makers.
- Defined project scope, timelines, deliverables and success metrics together with clients, researchers and business partners.
- Supported business development: proposals, client onboarding, relationship management and new opportunities.
- Led a small multidisciplinary team across concurrent engagements, covering execution, quality assurance and client satisfaction.

Associate Research Analyst & Digital Marketing Manager

Aug 2019 – Feb 2020

advinda Investor Cloud GmbH | Munich, Germany

- Analysed institutional investor and fund manager datasets to support research and consulting outputs; prepared structured reports and insights for sales and advisory teams.
- Supported Salesforce CRM reporting and drove data quality improvements across investor datasets.
- Managed Google Ads and Google Analytics campaigns, improving targeting and increasing qualified inbound leads by 40%.
- Led WordPress website development, content creation and SEO optimisation, ensuring brand consistency.

Database Manager & System Administrator

Jun 2007 – Sep 2017

Jawahar Navodaya Vidyalaya – Government of India | Kerala, India

- Managed SQL databases with 50,000+ records and built automated reporting solutions supporting administrative decision-making at a national government education institution.

EDUCATION

Master of Business Administration (MBA)

Sep 2018 – Feb 2020

Hochschule Bonn-Rhein-Sieg University of Applied Sciences, Germany | Graduated with High Honors

Master of Information Technology (MTech-IT)

Jul 2010 – Apr 2012

Karnataka State Open University, India | Graduated with High Honors

Bachelor of Computer Science & Engineering (BTech-CSE)

Jun 2003 – Apr 2007

Anna University, Chennai, India | Graduated with High Honors

KEY ACHIEVEMENTS

- Automated data workflows, saving 700+ manual hours per year and increasing team capacity without adding headcount.
- Increased qualified inbound leads by 40% through data-driven Google Ads and Analytics campaign optimisation.
- Built and scaled an investor data analytics startup (LP Data House) serving FinTech and research clients across 20+ projects.
- Maintained SQL databases of 50,000+ records with zero reported data loss over a 10-year tenure at a government institution.
- Delivered Power BI dashboards and KPI reporting systems adopted at executive level across multiple organisations.
